

Atle High - Back orthosis

ART.NO 50101

Elastic back brace that provides stable and comfortable support across the entire lower back. Suitable for low back pain, especially suitable for vertebral compression caused by osteoporosis. Suits most body shapes – men and women alike. A higher version of Atle Low 50100, Atle High is available in beige and black. The material provides excellent compression and is comfortable to wear because it is light, breathable, and soft against the skin. The ribbed structure of the material also helps keep the brace in position. Atle High features Velcro fastening front and centre. The elastic fastening straps are adjustable and provide stable support. They also feature Velcro fastening front and centre. The two replaceable back splints shape individually to suit the contours of the back.

Indications: Lumbal/lumbothoracal back pain.

Contraindications: Unstable back fracture. Sciatica pain of unclear genesis.

Material: Ventilated, breathable textile material that is gentle on the skin. Polyester 64%, Polyamide 14%, Natural Rubber Latex 12%, Elastane 7%.

Washing instructions: Machine wash at 40°C (104°F). Remove the splints. Seal the Velcros. Use washing bag. Do not bleach. Do not dry clean. Do not iron. Do not tumble dry.

Measurement: Hip circumference cm.
