

# LEDAD SVENSK hyperextension orthotics

ART.NO 70651

Articulated Swedish hyperextension orthotics used in hyperextension or instability of the knee joint. The instability can be caused by both muscle weakness around the knee as instability in the knee joint, ligament or joint capsule. Articulated Swedish is a long articulated model with adjustable straps. Aluminum frame, easy to personalize for the best fit. The soft straps allow the brace is comfortable in both standing and sitting position.

## Indications:

Hyperextension of the knee joint. Instability in varus/valgus. Neurological injury or disease that causes weakness in the muscles of the knee joint. Anterior cruciate ligament injury. Genu recurvatum.

## Contraindications:

Not intended for use during sports activity

## Material:

Frame: Aluminium. Band: Soft padding with Velcro, 100% nylon. Latex-free.

## Washing instructions:

Wash by hand, use a mild soap or detergent. Circumference 10 cm above the knee joint

Size	Circumference 10 cm above the knee joint	Art no
